   **Cars to be Delivered to Private Tracks**
   (a) Notification of constructive placement on all cars held on NS tracks due to any condition attributable to Consignee or Consignor.
   (b) Delivery of car upon Consignee tracks will constitute notification.
   (c) Delivery upon industrial interchange tracks of Consignee or party entitled to receive same will constitute notification.

   **Cars to be Delivered to Public Tracks**
   Notice of arrival will be given to party entitled to receive notification when car is actually placed.

   **Refused Carload Freight**
   When advised of refusal of car at destination, notice will be sent or given to Consignor or owner of the lading.

2. Notification information provided:
   (a) Car Initial and Number
   (b) If contents transferred en route, NS will furnish car initial and number of the original car and replacement car.

3. Methods and procedures for notification:
Notification may be sent or given by telephone communication or Electronic Means, (see Electronic Means, Item 200). When Consignor or Consignee utilizes an electronic or mechanical device (either in written, oral or keyed data form) notification left on such device will be considered as having been given to Consignor or Consignee, as of the date and time transmitted.

The Consignor/Consignee is responsible for providing NS with the correct contact or contacts for notification purposes.

1. **Weather Interference:** When because of earthquakes, tornadoes, hurricanes, floods or heavy snow, the operations of the Consignor or Consignee are disrupted, the demurrage/storage calculations will be adjusted to account for the disruption, provided the disruption exceeds (2) days in duration. Any cars under Constructive Placement (PCON) on the day of a disruption will also have car days adjusted to account for the disruption, if the disruption is affecting the ability to actually place the car that is under PCON.

2. **Frozen or Congealed Lading:** When at the time of placement, lading is frozen or congealed so as to require heating, thawing, or loosening to unload, Railroad will grant 1 credit for each day a car under actual placement that has its lading heated, thawed or loosened, with a maximum of 2 credits. All cars under Constructive Placement (PCON) at the time the lading contained in a car that has been actually placed is heated, thawed or loosenened will receive an adjustment to car days to correspond with the cars that are actually placed, to the extent that the car(s) under PCON are in that status due to insufficient space at customer's facility.

   A Consignee desiring additional credits for unloading shall, prior to the expiration of (10) car days, after the date on which the car was released, send or give NS a written statement certifying the car initial and number, that the lading required heating, thawing or loosening. NS will not provide relief for the day on which a car was actually unloaded as certified.

3. **Strike Interference:** When it is impossible to load or unload or receive cars from or make cars available to NS because of strike interference at the point where the loading, or unloading or receipt of cars is to be accomplished, demurrage days will be charged at the rate of $30.00 per day during the period of strike interference, provided:

   (a) The disruption exceeds five (5) days in duration during one calendar month; and
   (b) No Management personnel or reduced work force is available to perform work.
