January 12, 2010

Dear Valued Ethanol Customer:

Effective immediately, all ethanol tanks cars shipped to the following Norfolk Southern Thoroughbred Bulk Transfer (TBT) facilities must be equipped with a functioning air inlet pipe and valve assembly capable of ready connection to the vapor control recovery system used by the facility to transload the ethanol product. Tanks cars not meeting this requirement will be held pending disposition orders from the shipper.

- Alexandria, VA
- Charlotte (Pineville), NC
- Doraville, GA

If you have any questions or concerns, please don't hesitate to contact us.

Thank you for your business.

Sincerely,

Alan Julian – NS, Director of Marketing
