

**INDUSTRY-FOCUSED
INDUSTRY APPROVED**

e-RAILSAFE is a comprehensive web-based solution that facilitates day-to-day administrative tasks such as contractor/vendor enrollment, personnel screening, compliance awareness, and security access credentialing.

The service not only enhances Critical Infrastructure Protection (CIP), but can also help in meeting the safety and security mandates from participating Class 1 Railroads in the United States and Canada:

e-RAILSAFESM is just one of several Access Management and Risk Assessment Systems developed by e-VERIFILE.COM Inc.

e-VERIFILE.COMTM provides innovative solutions that accelerate risk assessment decisions and streamlines routine administrative tasks for a variety of organizations and industries worldwide.

A SERVICE OF e-VERIFILE.COM

MULTIPLE FEATURES

EASY TO USE

Use e-RAILSAFE to access an array of On Demand Risk Assessment and Custom Support Solutions all from one web-based platform:

- **Personnel Screening**
Easily search and verify background information on employees and contractor personnel such as criminal, civil and credit reports, compliance data, information from government databases and more.
- **Personnel/Contractor Data Management**
Keep track of important personnel or contractor data which can be automatically evaluated, indexed and easily retrieved for future viewing.
- **Compliance Awareness & Testing**
Make sure your employees, contractors/vendors and their personnel comply with internal and regulatory requirements by delivering orientations and training online.
- **Security Access Credentialing**
Easily manage the process of producing, issuing and documenting customized security I.D. badges for contractors, vendors and their employees.

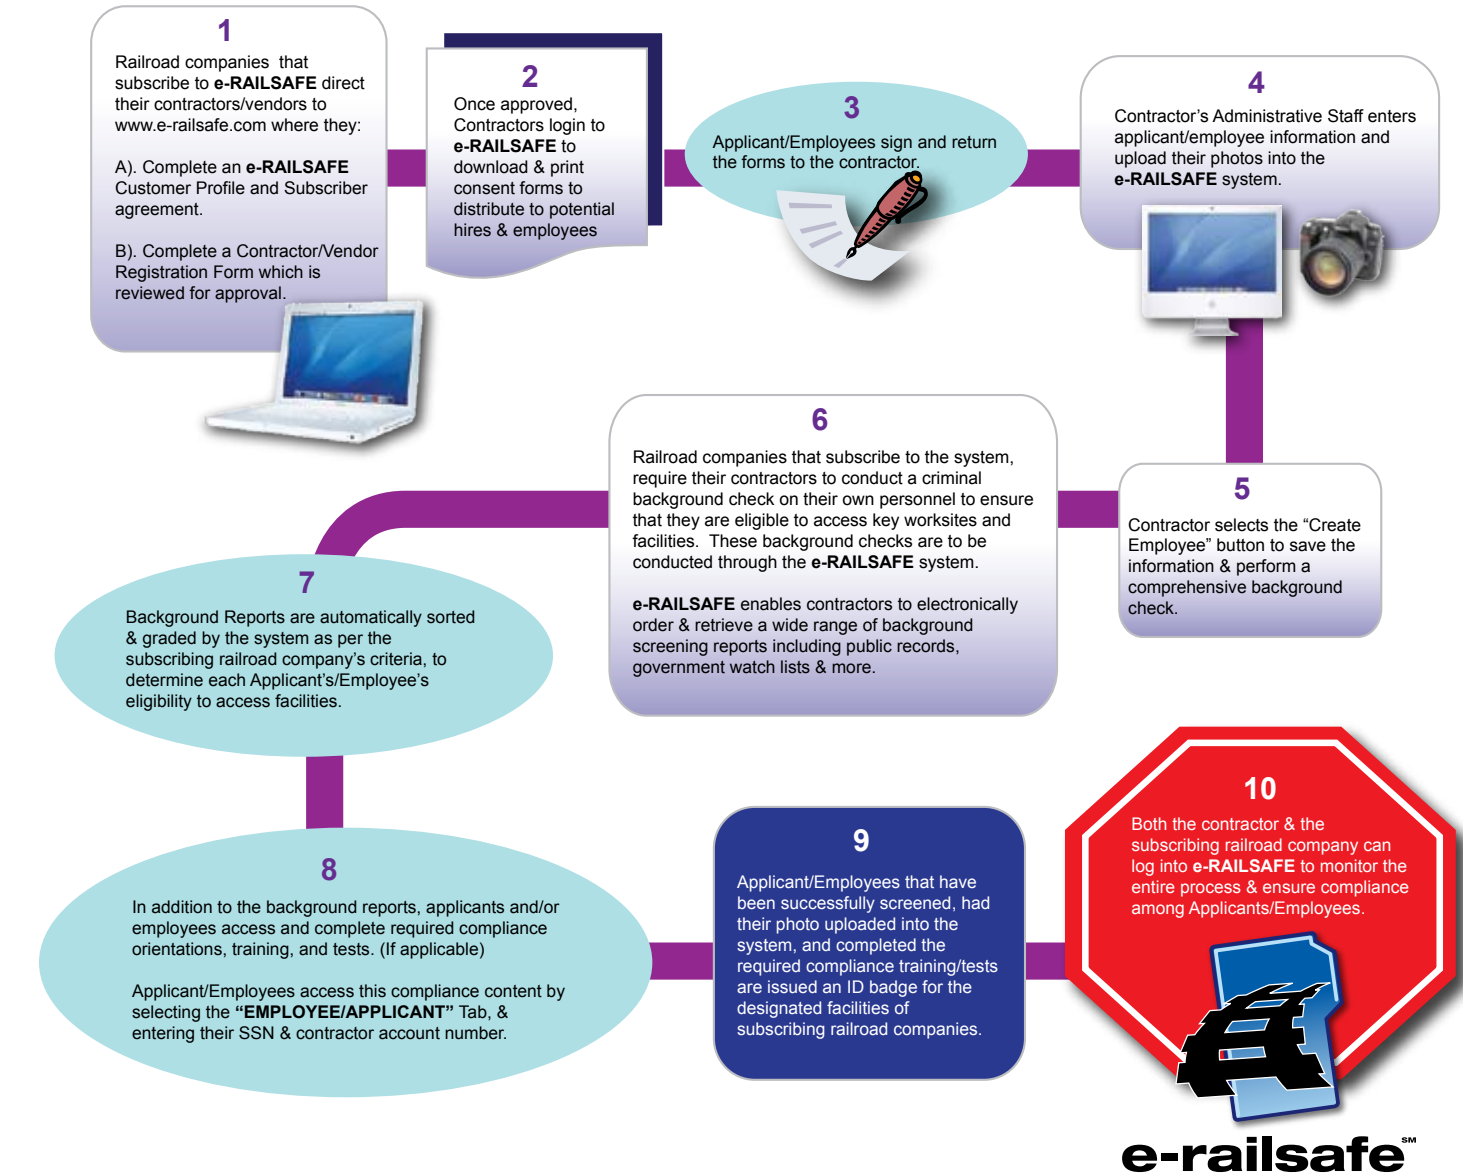

No additional software or equipment is required to use e-RAILSAFE and the system can be securely accessed from any PC, anywhere at anytime.

Visit www.e-railsafe.com for details.

Given heightened security concerns, the Class 1 Railroads operating in the United States and Canada have initiated a process to safeguard their people and assets.

As part of these efforts, contractors doing or seeking to do business with any of the major railroads are now required to be compliant with both the internal and regulatory requirements of the railroads.

e-RAILSAFE was developed to help ease this process.
